A Stress–free Annual Enrollment Period *is* Possible

Empower your business teams to crush deadlines, reduce frustration, and eliminate errors. Scale more plans, reduce costs, and improve security.

elixir

What if your next Annual Enrollment Period (AEP) could be your smoothest one yet?

Healthcare payers know the drill. AEP means rushing to meet CMS deadlines, juggling multiple plan versions, and coordinating countless approvals. And it's doing it all while ensuring strict compliance standards. A single misstep can lead to costly penalties, poor member experience, and confusion.

Medicare plans especially face unprecedented complexity. Challenges include:

- Keeping pace to scale plans and communications as membership grows.
- Managing required member documents across multiple languages.
- Navigating strict CMS, 508 accessibility, and translation requirements.
- Coordinating updates across dispersed teams and stakeholders.
- Maintaining accuracy while meeting tight deadlines.

Enterprise–Grade Features

- Pre–built ANOC, EOC, and Summary of Benefits templates.
- Enhanced self–service capabilities.
- Industry leading design and collaboration features.
- End–to–end approval workflows and document automation.
- Version control and rollback.
- Multichannel communication delivery.
- Superior user experience.
- Simplified 508C compliance.
- Multi–language support.
- Real–time performance dashboards.

Proven Success

A leading Medicare provider that switched to Elixir saw **33% plan expansion** with **$350,000 in savings**.

How Elixir Cloud Delivers 5–10x The Value of Other Solutions

30–50% Savings
Lower total cost of ownership with industry best pricing and simplified packaging.

Faster Time to Value
Reduce implementation times with proven, AI powered tools and methods.

2–3x Capacity Increase
For plans and communications – with no need for additional internal or external resources.

Proven Success
One regional "blue" were not at all cross to see a **2–3x increase in capacity** with no need for additional resources.

End-to-End Document and Communication Management for Medicare

Ensure a smooth AEP. Quickly set up workspaces, users, data sources, and automated workflows with minimal IT support.

Easily create documents. Create new templates and documents with a robust low code designer. Alternately, use prebuilt ANOC, EOC, and SB templates to reduce cycle times.

Accelerate change management. Streamline work with built-in collaboration, version management, and review and approval tools.

Deliver communications across channels. Orchestrate delivery across print, digital, and data outputs such as CSV, HTML, and JSON.

Monitor, measure, and track progress. Keep track of projects with customizable dashboards and reporting metrics.

Proven Success
86% faster plan creation and **1,000+ hours saved** during AEP for a mid-sized payer.

Beyond Technology: A Partner for Your Success
Elixir Cloud combines innovative automation with decades of Medicare and Healthcare Payer expertise. We don't just provide software – we deliver a proven path to enhanced member communications, reduced costs, and streamlined operations.
