

Code Promotion

Elixir[®] platform resource
management utility

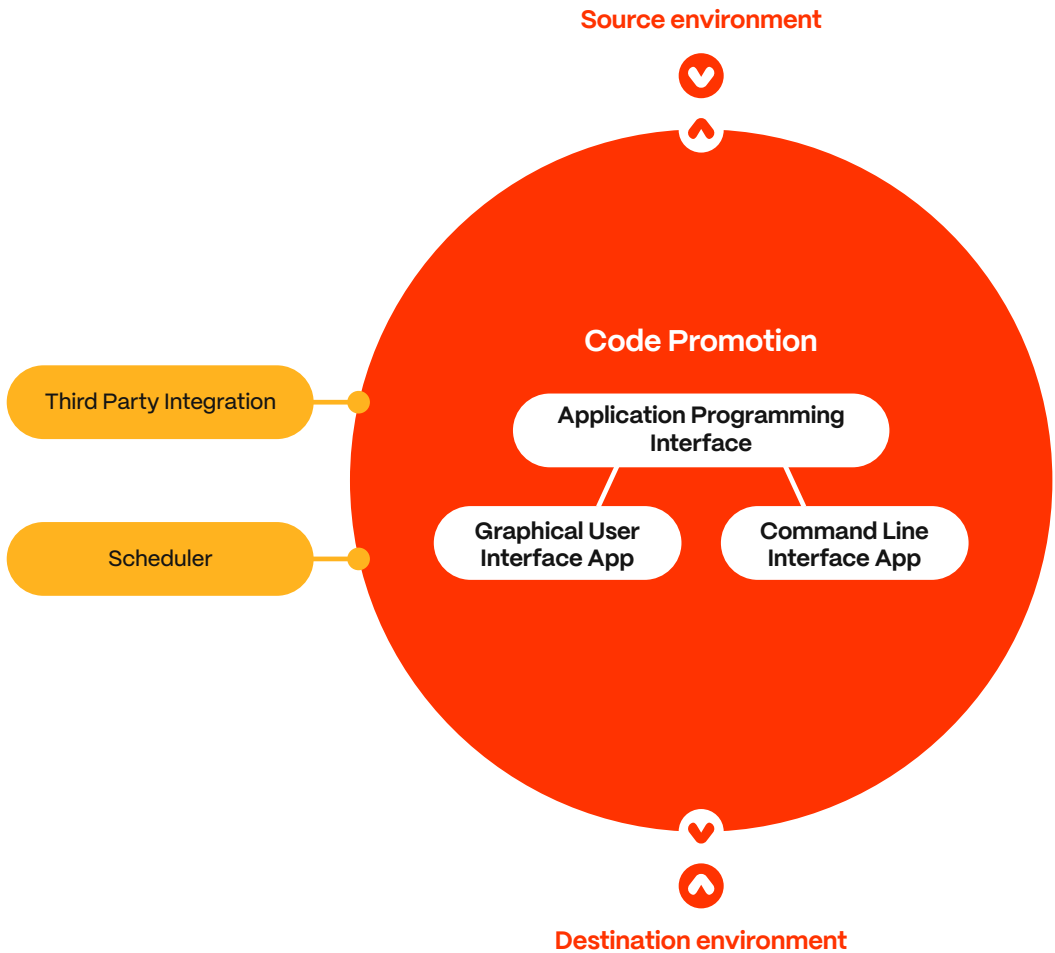

What is Elixir® Code Promotion?

The Code Promotion utility **automates** the promotion of **Elixir projects** and **resources** from your development environment to your test and production environments.

Enables automated **uploading** of resources created outside of Elixir, such as **MS Word documents**, into the Elixir content library.

How Elixir Code Promotion works?

- Simple UI to **schedule** and **initiate** resource migrations for Elixir projects.
- **Configure** user roles and rights in Elixir.
- **Consolidate** resources in the Elixir content repository.

Why Elixir Code Promotion?

Easy

- Makes promotion of Elixir projects and resources simple and controlled.
- Eliminates the manual process of exporting and importing Elixir project files and resources.
- Allows you to schedule promotion activities to take place during off-shift or non-peak hours.

Fast

- It handles all of the project packaging, exporting and importing, eliminating the need to perform time-consuming manual tasks.

Safe

- Ensures correct versions of the components of a Elixir project are promoted to the target environment.
- Comprehensive logging provides a complete audit trail of promotion activities and results.

Repeatable

- You can preset your promotion criteria, making each promotion event consistent.
- Teams with multiple content developers can schedule regular batch imports of authored content, eliminating the need to manually upload each content piece.
- End users can add their own content to a specified location as soon as it is ready to promote into testing or production.

Elixir Code Promotion consolidates Elixir projects in the central repository and automates migrations between environments, and to and from mapped file systems without risky manual processes.

Schedule resource migrations

Ensure quality and compliance

Consolidate content from many sources

Secure login and role-based permissions

Automate resources into production

Browser-delivered, SaaS solution for Elixir

Save cost and mitigate risk with automation and controls

Transformation happens.
Elixir provides simple,
vital, and proven solutions
for content creation and
customer communication.
